

Custom Stainless Steel and Aluminum Fabrication for the Animal Industry

The Bush Box is an all aluminum dog box with solid rod sides, back, and door. The bottom of the box has a solid sheet floor. The sheet comes up 4 inches to keep any water or liquids from escaping the Bush Box. This helps keep your vehicle dry when you have a wet dog riding with you. The spring-loaded latch on the front panel is pad-lockable.

Optional Accessory Items:

- Raise rubber flooring. Keeps animal up out of any water or liquids.
- Sheet side slide in dividers: can be aluminum, camo or customized for your kennel logo.
- Padded seat cushion for top of box.
- Easy attachable shade screen. Allows dog to see out while keeping him hidden inside.

MADE IN  TEXAS
